10/12/89

Dear Jim,

The redacted names include Groden and Livingstone, perhaps others.

But is it worth any effort to try to get the names disclosed?

It was Livingstone who was trying to sell the pictures. It was published in papers I clipped.

Unless you or Bud has an interest, I don't.

But reading those records reminds me that nothing has been done about getting those Zapruder slides. Do you want to speak to Bud? You said you would.

And where they refer to finding the dictabelt of the DPD broadcasts, that is within my field offices suit, they located this particular belt, I asked that it be duplicated and they replied it was in such poor condition they didn't dare use it again. I don't believe it, tapes exist, and I think this is more likely to produce something of usefulness than getting those names.

You can compromise on the tape Dallas FBI made and transcribed for the Commission. With Phillips not there they may not recall their lies about it.

Thanks and best,
